Statement regarding Bisphenol A in Koehler Thermal Paper Grades

The use of **Bisphenol A** (CAS RN 80-05-7) in thermal paper in the EU is restricted with Regulation (EU) 2016/2235, amending Annex XVII to Regulation (EU) 1907/2006 (REACH). Since January 02, 2020, thermal paper with a concentration of Bisphenol A ≥ 0.02 % by weight shall not be placed on the market.

We hereby confirm that all **Koehler Thermal Paper grades** are produced without the intentional addition of Bisphenol A, and it can be assured that the Koehler Thermal Paper grades are in compliance with the above-mentioned threshold value for Bisphenol A.

This information is based on information provided by our raw material suppliers as well as compliance testing performed by external laboratories and reflects the current state of knowledge.
